How AI Assistance Workflow is Triggered

Triggers: AI Assistance can be triggered through multiple input sources like:

- **Chat:** Automate responses to customer queries or business inquiries.
- **Voice Commands:** Trigger workflows using voice inputs via smart devices.
- **Emails/Webhooks:** Automatically respond or take actions when specific events occur.
- **Social Media:** Trigger actions based on Facebook, Instagram, or LinkedIn activity.
- **HTTP Requests:** Integrate with external apps using HTTP calls.
- **Database & Excel:** Trigger workflows when data is added or updated in databases or spreadsheets.

Seller Tools Amazon/ Woocommerce

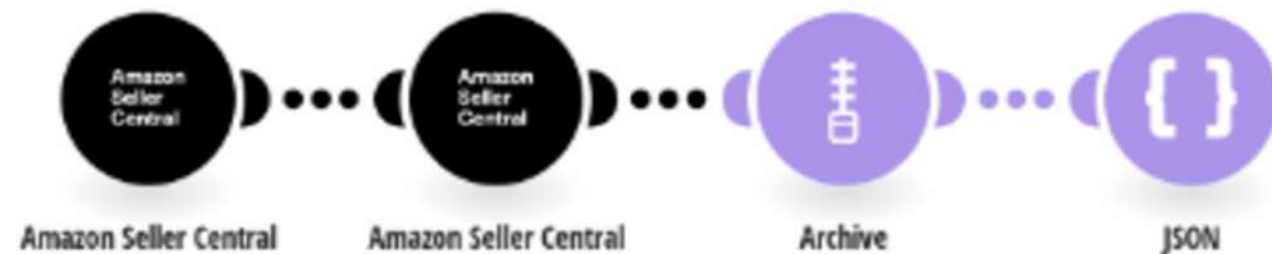

Product Recommendations: Implement AI-powered recommendation engines to suggest relevant products to customers.

Price Optimization: Use AI to dynamically adjust product prices based on market trends and demand.

Supply Chain Optimization: Optimize inventory levels and logistics using AI-driven forecasting and optimization techniques.
